

Cooperative Computing Privacy Policy

Cooperative Computing respects the privacy of its online users and maintaining their privacy and confidentiality is considered a primary concern. This statement of Cooperative Computing's privacy policy reflects the basic concern of gathering users' information and the measures taken to completely ensure users' security and confidentiality.

For Cooperative Computing, the basic reason for gathering and storing users' information is to improve the quality and overall web experience when they are on Cooperative Computing. The design and development team keeps the website fully up to date with the latest user interface requirements based on the vital information gathered and stored from website visitors.

With this statement of privacy policy, Cooperative Computing hereby ensures to maintain the users and specially customers' highly confidential and private information with the utmost security and privacy. Through this statement of privacy policy, Cooperative Computing also ensures that it does not and will never have the intention to share or sell the users' and customers' confidential information by any means, to anyone, or in any way. In order to explore in detail and learn more about Cooperative Computing third-party information sharing, exchange and interaction, you may visit the section of "Third Party Sharing" stated below in detail in this statement of privacy policy.

Purpose

The core purpose of this statement of privacy policy is to comprehensively describe why Cooperative Computing collects and stores users' and customers' information and under what scenarios and circumstances Cooperative Computing shares this information with third parties. In addition to the purpose of this statement of privacy policy, it also reflects that

Cooperative Computing collects unique information from users and customers, for which purpose and how it is used.
